

Our Vision:

“Universal access to high quality, affordable medicines and health products.”

Our Mission:

i+solutions is an independent, international, not-for-profit organization specializing in pharmaceutical supply chain management for low and middle income countries. We offer high quality integrated supply chain - and consultancy services focusing on the fight against HIV/AIDS, Malaria, T.B., their prevention and on Reproductive Health activities through: Innovation, Information Technology, Creativity and Effective execution.

Our key areas of expertise include:

- Procurement & Supply Services
- Training & Consultancy Services
- Development of innovative projects

The provision of these services enables our partners and clients - being governmental, private, public or charitable organizations - to achieve their objectives, which may include capacity building, increasing local knowledge and expertise, strengthening local health systems, or ensuring a reliable supply chain of high quality, affordable pharmaceuticals and health products.

Our work is driven by the core values of

- **Integrity** (responsibility, accountability, transparency)
- **Diversity** (people, valuing individuals, complementarities)
- **Team work & partnerships**(integrated approach, thorough+comprehensive)
- **Customer focus** (going the extra mile / tailor made services)
- **Result focus** (Fact and output based, Impact, SMART, short and long term)

Our partners include International Organizations such as WHO, UNFPA, UNDP, The Global Fund To Fight AIDS, Tuberculosis and Malaria, UNITAID, Ministries of Health and of Foreign Affairs, NGO's and private companies. We are the major pharmaceutical procurement partner in the PfSCM coalition for the US Government funded PEPFAR/SCMS program and the Voluntary Pooled Procurement (VPP) program of the Global Fund, with a total yearly procurement volume over 200 million USD.

i+solutions is a young and dynamic organization located in Woerden in the Netherlands with an office in Washington DC. We employ about 40 persons and often work in partnership with other organizations and with sub-contractors across the globe.
